Core Skills

- Business Analysis (BABOK)
- Requirements Workshops
- User Stories & Acceptance Criteria
- Process Design & BPMN
- Use Cases & UML
- Requirements Traceability (RTM)
- UAT & Release Readiness
- Process Improvement
- AI-Assisted Analysis
- Stakeholder Management
- Team Leadership
- Agile / Scrum / SAgE

Domains

- CPQ Pricing Approvals
- Enterprise Tools SaaS
- Two-sided Marketplaces AI / ML
- B2B B2C Manufacturing
- Medical Tourism

Tools & Technologies

- Jira Confluence ServiceNow
- Claude Code Claude Cowork
- ChatGPT Miro Draw.io
- Lucidchart Figma Power BI
- Postman BPMN UML SAP
- Salesforce Snowflake REST API
- JSON SQL Data Modeling
- Jira Forge LLM APIs MCP
- Agent Skills SOX / ISO 9001

Profile

Senior Business Analyst, 6+ years on the global CPQ platform of a Fortune 500 manufacturer, used in 160+ countries. Runs requirements workshops, models processes in BPMN, and writes the specifications, user stories and acceptance criteria engineering builds from, through UAT. 300+ specifications, launches held at 0 critical defects. Leads the BA team and rolled out AI tooling that cut time per specification by about 32%.

Experience

Soprex.com

Belgrade, Serbia

Senior Business Analyst / Product Owner

2022 - Present

- Lead requirements workshops across **10+ workstreams** and turn them into gap analyses, ToBe BPMN, use cases and **300+ specs** for 5 delivery teams.
- Write user stories with acceptance criteria, decomposed to roughly 2-hour tasks, and take each feature through UAT and release readiness with QA. Launches held at **0 critical defects**.
- Specified the Approval Web Application, live in **160+ countries**: multi-tier sign-off, SOX and ISO 9001 traceability, and REST API contracts for SAP, Salesforce and Snowflake.
- Manage the BA team and **2 development teams** (around 15 people). Raised BA standards with shared templates and one elicitation process across the BA and PM team.
- Led AI adoption in the BA team: Claude Cowork ticket creation, MCP into Jira and ServiceNow, usage guidelines and training for about 50 users. Time per spec fell **about 32%**.
- Use AI daily in my own analysis. Claude Code drafts and gap-checks SRS, HLE and BRD and generates test cases. I check every output before it goes out under my name.
- Specified and delivered the platform's **first AI agent**: a voice-command assistant on an LLM layer across OpenAI, Gemini and Grok, with provider switching and fallback.

AI Initiative: Jira Rollout and Automation

2026 - Present

- Rolled out Jira Cloud to **50+ users, 10,000+ tickets** and hundreds of projects: one hierarchy, shared schemes and time tracking, projected to save about 350 hours a year.
- Wrote a Forge app in Node.js (**95 unit tests**) that rolls estimates and logged hours up the hierarchy, plus dashboard gadgets that show each user their own hours.
- Trained PMs, BAs and end users, backed by user guides with annotated screenshots.

Business Analyst

2021 - 2022

- Documented pricing, discount and approval rules for 160+ countries as ToBe BPMN.

Junior Business Analyst

2020 - 2021

- Ramped on a Fortune 500 CPQ domain: user stories, test cases, UAT and defect triage.

Booking.dentist

Medical-Tourism Marketplace · via Soprex

Business Analyst / Product Owner

2021 - 2023

- Sole BA on a two-sided B2B/B2C marketplace live in **35+ countries**. Ran discovery with the Mom Test, then specified the booking, cancellation and multi-currency rules.
- Specified both products on one shared data model and rules engine, a consumer booking app and an internal back-office, then owned UAT.
- Wrote the business case, KPIs and MVP roadmap behind **EUR 250,000** in seed funding, raised through Katapult, and cut **348 hours** of non-MVP scope to hold the launch date.
