Profile

Senior Business Analyst & Product Owner, 6+ years on the global CPQ platform of a Fortune 500 manufacturer, used in 160+ countries. Runs stakeholder workshops, models processes in BPMN and writes the specs engineering builds from, then takes each feature through test cases, UAT, release with DevOps and hypercare. 300+ specifications, launches held at 0 critical defects, and AI tooling that cut time per spec by about 32%.

300+	160+	0	~32%
Specifications delivered	Countries served	Critical defects at launch	Less time per spec

Experience

Soprex.com — Belgrade, Serbia

Senior Business Analyst & Product Owner — 2022 - Present

- Lead requirements workshops across **10+ workstreams** and turn them into gap analyses, ToBe BPMN, use cases and **300+ specs** for 5 delivery teams.
- Write user stories with acceptance criteria, split into ~2-hour tasks, and test cases with QA. Plan releases with DevOps and run post-release hypercare. Launches held at **0 critical defects**.
- Specified the Approval Web Application, live in **160+ countries**: multi-tier sign-off, SOX and ISO 9001 traceability, and REST API contracts for SAP, Salesforce and Snowflake.
- Manage the BA team and **2 development teams** (~15 people), with shared templates and one elicitation process.
- Led AI adoption in the BA team: Claude Cowork ticket creation, MCP into Jira and ServiceNow, usage guidelines and training for about 50 users. Time per spec fell **about 32%**.
- Use Claude Code daily to draft and gap-check SRS, HLE and BRD. I review every output.
- Specified and delivered the platform's **first AI agent**: a voice-command assistant on an LLM layer across OpenAI, Gemini and Grok, with provider switching and fallback.

AI Initiative: Jira Rollout and Automation — 2026 - Present

- Rolled out Jira Cloud to **50+ users, 10,000+ tickets** and hundreds of projects: one hierarchy, shared schemes and time tracking, projected to save about 350 hours a year.
- Wrote a Forge app in Node.js (**95 unit tests**) that rolls estimates and logged hours up the hierarchy, plus dashboard gadgets that show each user their own hours.
- Trained PMs, BAs and end users, backed by user guides with annotated screenshots.

Mid-Level Business Analyst — 2021 - 2022

- Documented pricing, discount and approval rules for 160+ countries as ToBe BPMN.

Junior Business Analyst — 2020 - 2021

- Ramped on a Fortune 500 CPQ domain: user stories, test cases, UAT and defect triage.

Booking.dentist — Medical-Tourism Marketplace · via Soprex

Business Analyst & Product Owner — 2021 - 2023

- Sole BA on a two-sided B2B/B2C marketplace live in **35+ countries**. Ran discovery with the Mom Test, then specified the booking, cancellation and multi-currency rules.
- Specified a consumer booking app and a clinic back-office on one data model, then owned UAT.
- Wrote the business case, KPIs and MVP roadmap behind **EUR 250,000** in seed funding, raised through Katapult, and cut **348 hours** of non-MVP scope to hold the launch date.
